IBM India, Bangalore

Software Engineer

Aug 2021 - till now

I am working for IBM India at Bangalore location, as a software engineer im working extensively in **ReactJs, NodeJs, Redux, MERN stack, Java, DevOps** to provide faster highly performant web applications to customers

Biencaps Systems Pvt Ltd.

Software Engineer

sept 2020 - Aug 2021

It was a startup based out of pune, I was responsible for designing UI/UX, developing webapps in MERN Stack which were also mobile responsive, testing and deployment

Project 1

Dec 2021 - Feb 2022

Live chatting web app - Blablah.app

This is a responsive webapp build using **NextJs, ReactJs, NodeJs, Socket.io, Docker, DigitalOcean droplets** which helps user find friends and have conversations, this app also has privacy control features like negative keywords that cannot be used while chatting, image sharing with ip address watermarking

Project 2

March 2021 - May 2021

Virtual digital tour - 360nearme.in

This was an idea that i had in my mind that it would have been great if we could digitally experience the next hotel, resort, restaurant where we want to visit, so I created an webapp based on **Nodejs(ExpressJs) backend, MongoDB database, NextJs, ReactJs** frontend, also integrated threejs based wrapper libraries like panellumJs to provide digital experiences my taking 360 degree pictures of actual environment

Project 3

Jan 2020 - march 2020

Attendance using face-recognition

In this project we did a attendance desktop app which used face recognition to mark students attendance, this attendance part was done in python by integrating open source libraries, UI was built in FXML, logic was developed in core java and database used was Cloud hosted **mongoDB** database provided by **cloud Atlas** by mongoDB. Best thing we learned was basic interoperability between **java and native C through JNI**

Education

BE: Information Technology

June 2017 - July 2021

Smt Kashibai Navale College Of Engineering (SKNCOE), Pune University

CGPA: **8.00** (First class with distinction)

Skills & Competencies

Core java

Python

Javascript

Win32SDK

UNIX Operating System

ReactJs

NextJs

Nodejs, Expressjs, jwt, redis

Redux

SQL

HTML5 & CSS3, SCSS/SASS

GIT

C language

COM - Component Object Model

Web Development

Firebase, Digital Ocean

Tools

VS Code | Postman | STS | Figma
